Sub: Comments on Notice of Proposed Rulemaking (in the Matter of ET Docket No. 21-264)

Dear Sir,

TecAHEAD Incorporated (hereafter TecAHEAD), a company registered in Daejeon, Korea (Company Reg. No 220-88-24827) would like to comment on the Subject above.

TecAHEAD has been preparing for a consumer product, in which 60 GHz pulse radar sensor is installed, planning to market the product in the United States.
For this reason, TecAHEAD is very much concerned about FCC's adopting rules that will allow for these radar operations.

TecAHEAD supports the proposals for new rules that were made by Acconeer in its comments filed in the proceeding (ET Docket No. 21-264).

It is important for the FCC to promote advances in new radar technologies by adopting rules that are flexible, consistent with the ETSI standards, and technologically neutral. This will allow manufacturers greater certainty in developing innovative radar technologies in a cost-effective manner.

Because of TecAHEAD's planned use of pulse radar technology, it is especially important that the Commission ensure that all types of radar systems are treated equally when considering the impact of proposed technical rules on their specific operations.
It is sincerely believed that the Commission should not inadvertently provide a competitive advantage to some other parties by adopting rules that have varying consequences on different radar technologies.

We do hope that Commission draws and adopt a wise policy.

Sincerely Yours,

Hosun Chung
CEO/President
